IN-LINE FLAT-BED

ELASTICATED FLAT-BED FEEDERS

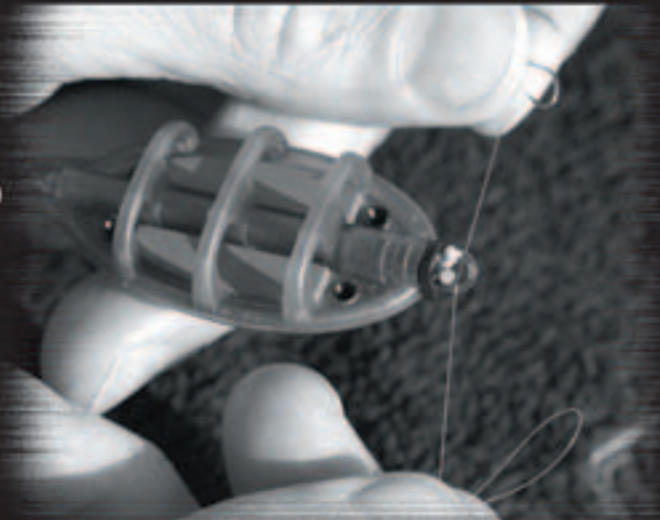

CARP FEEDERS

Fox Feeders cover every conceivable situation: Open ends, Blockends, Method feeders, inliners..... All models are manufactured from hard-wearing durable plastic to cope with the stress and strain of repeated casting. A dull, translucent, matt brown finish makes the feeders less conspicuous in water. From small to large, light to heavy, they cover everything from small skimmers and roach on stillwaters to barbel on big rivers.

FLAT-BED FEEDERS

Fished with a short hooklength, these revolutionary In-line Flat-Bed Feeders are perfect for fishing to islands and far banks, especially on commercial fisheries. The flattened base eliminates roll when used on sloping bottoms and ensures they land 'base down'. Two models are available: an elasticated version with No.12 Fox elastic and an Inline version. Available in Large and Small sizes in weights of 20g and 28g.

CARP FEEDERS

New enhanced design of the best-selling Fox Carp Feeders. Two of the fins are internally weighted to ensure the feeder always lands the correct way up with the hook bait on top. The in-line design allows them to be semi-fixed to the mainline with a swivel for maximum bolt effect, but still remain 100% fish safe. Available in two sizes, standard and compact.

SWIVEL FINNED FEEDER

IN-LINE FINNED FEEDER

FREE FLOW OPEN END FEEDERS

FINNED FEEDERS

These new and unique feeders offer a number of advantages over traditional designs.

- Improve in-flight stability, increasing distance and accuracy
- Positive locking cap mechanism
- Reduces feeder roll on rivers allowing less weight to be used.
- Two models are available, medium and large.
- Available in weights of 0.5oz, 1oz, 1.5oz, 2oz and 3oz.

FREE FLOW™ ROTARY END FEEDERS

Rotary End Feeders featuring a unique, twist cap system which allows the rate of feed to be altered. A swivel link allows the feeder to be fished running on the main line or fished Paternoster style. Available in four sizes: small, medium, large and XL. Weights range from 1/4 oz to 2 oz.

FREE FLOW ROTARY END FEEDERS

FREE FLOW™ OPEN END FEEDERS

These open end feeders cast far more accurately due to their finned design. They attach to the line by way of a simple swivel link allowing them be fished on a running rig or paternoster style. Available in four sizes: small, medium, large and XL. Weights range from 0.5 oz to 2 oz.

FREE FLOW INTERCHANGEABLE FINNED FEEDER WEIGHTS

Interchangeable weights supplied in packs of five, four and three for the small, medium and large feeders respectively. These spare weights fit all the respective sizes of feeders using our key lock mechanism. This allows the angler to alter the weight of the feeder without breaking down.

Removing and adding weights is simple thanks to Fox's key lock system. Place the weight on the feeder through the two holes then slide into position, locking the lead in place. To remove, simply reverse.

Spare weights can be purchased separately allowing a truly modular feeder system to be created.

The Fox Free Flow feeders have a unique interchangeable weight system. If the wind picks up and more weights is needed to cast the required distance, a bigger weight can be added without breaking down your terminal tackle or changing the feeder. On rivers where the flow can increase or decrease this is an invaluable aid.

FREE FLOW MESH FINNED FEEDERS

Mesh style open end feeders perfectly suited to groundbait and pellets. Available in three sizes: small, medium and large. Five different weights are available and are interchangeable (for the same size of feeder) allowing the angler to customise the feeder without breaking down.

FREE FLOW SOLID FINNED FEEDERS

Solid plastic open end feeders which are specifically designed for feeding "live" baits such as maggots and squatts. Once either end is plugged bait cannot escape as the feeder falls through the water ensuring the hook bait is surrounded by loose offerings. Revolutionary captivated swivels allow anti-tangle attachment to the line.

FREE FLOW MESH FINNED FEEDERS

Medium Available in 14, 21, 28 and 42 gram

Large Available in 14, 21, 28, 42 and 56 gram

Small Available in 14, 21 and 28 gram

FREE FLOW SOLID FINNED FEEDERS

Medium Available in 14, 21, 28 and 48 gram

Large Available in 14, 21, 28, 42 and 56 gram

Small Available in 14, 21 and 28 gram

Ledger Weights

LEDGER WEIGHTS

These small weights have been Computer Engineered to optimise casting distance and performance. Flat areas on either side of the lead mean they will stay in position on sloping and uneven ground, or fast flowing rivers. A small free running swivel is encapsulated in the top of the weight which allows them to be fished free running in a loop, paternostered or fixed. A total of nine sizes are available ranging from 1/8oz to 2oz.
