PREDATOR

Braid Knot Picker

A small gadget, incorporating a stainless needle with a tiny hook end, which will prove invaluable to anglers who use braided reel lines and have suffered from wind knots or over runs!

The tiny hook end, which will help pick knots from braid.

PAC001 Braid Knot Picker £1.99

BRAID

and LINES

To complement our already extensive range of rods, reels, lures and predator products we have provided a selection of lines to accommodate every type of predator fishing. Mono remains popular amongst bait anglers although there is an increasing trend towards the use of braid. Lure fishing requires braided lines which help detect bites better and keep hooks tightly set. Whichever line you need, look no further than these pages...

NEW!
for 2008

Torque™ Braid

Torque is a next generation high performance braid, designed and constructed specifically for the predator angler. Torque has also proved very effective when bait fishing for pike and zander as well as catfish in the higher strains! Featuring our Microbond weave which provides a super smooth feel and a round profile ensuring it casts smoothly and resists bedding in. Constructed from 100% Dyneema and displaying a high abrasion resistance, Torque is in our opinion the ultimate braid for today's predator angler. Available in 15lb, 20lb, 30lb, 50lb, 65lb and 80lb on both 150m & 300m spools.

PML006	15lb x 150m	£16.95
PML007	20lb x 150m	£16.95
PML008	30lb x 150m	£19.95
PML009	50lb x 150m	£19.95
PML010	65lb x 150m	£24.95
PML011	80lb x 150m	£26.95
PML012	15lb x 300m	£29.95
PML013	20lb x 300m	£29.95
PML014	30lb x 300m	£36.99
PML015	50lb x 300m	£36.99
PML016	65lb x 300m	£49.99
PML017	80lb x 300m	£49.99

Barbuster®

Barbuster has been developed utilising similar technology to Soft Steel and has undergone the same rigorous field testing. It has been developed with the focus on providing superior abrasion resistance. It still retains the key characteristics of exceptional wet knot strength and consistent diameter needed to make a great predator line. It has few equals when fishing in snaggy and weedy waters for large predators. It's available in three breaking strains.

ML3307	10lb/4.53kg	0.30mm
ML3308	12lb/5.44kg	0.35mm
ML3309	15lb/6.80kg	0.40mm

* Supplied on 1/4lb spoos

Soft Steel® Monofilament

Displaying high abrasion resistance coupled with superb suppleness, Soft Steel is a line that has passed every conceivable test with flying colours. Despite its abrasion resistance, the line is remarkably limp and resists line twist very well. The neutral brown colour of this excellent mono is the finishing touch on what many leading pike anglers consider to be the ultimate pike mono. The 20lb version is perfect for UK cats too! A camo version is also available. This uses advanced dying technology to create a camo pattern with five different tonal colours that alternate every 15-20cm. A definite edge when fishing for pike in clear waters.

ML1082	Soft Steel	10lb/4.5kg	0.30mm
ML1083	Soft Steel	12lb/5.4kg	0.34mm
ML2060	Soft Steel	15lb/6.7kg	0.39mm
ML2560	Soft Steel	20lb/9kg	0.42mm
CML025	Soft Steel Camo	10lb/4.5kg	0.30mm
CML026	Soft Steel Camo	12lb/3.4kg	0.34mm
CML027	Soft Steel Camo	15lb/6.7kg	0.39mm
CML028	Soft Steel Camo	20lb/9kg	0.42mm

Supplied on 1/4lb spoos

Trollmaster Braid

Trollmaster is a low diameter, low stretch, floating braid which makes it ideal for trolling and 'bottom bouncing'. The braid doubles as the perfect main-line for float fishing baits as the low stretch means contact with the fish is almost instant. Supplied on 250m spoos.

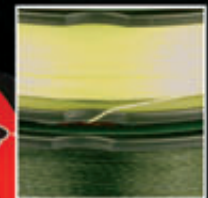

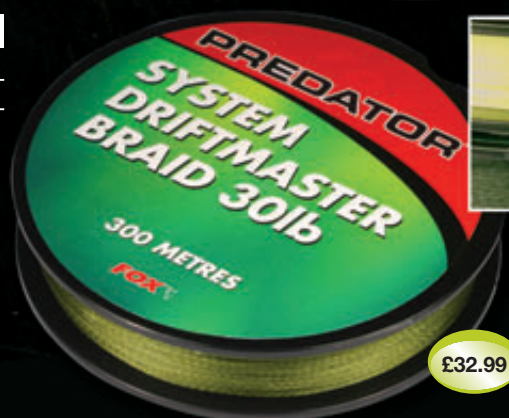

PK1073	20lb - 250m
--------	-------------

Driftmaster Braid

Drifter float fishing has had all of its frustrations taken away by substituting braid for mono. No more line greasing and no more abortive striking of runs at range. The System Driftmaster Braid is a specially formulated low diameter floating braid with virtually no stretch to aid hooking fish at extreme range when fishing with drifter floats. It also performs well as a feature finding/marker float braid. Supplied on 300 metre spoos with a breaking strain of 30lb.

PK1069	Green - 300m
PML001	Yellow - 300m

System Driftmaster Braid is available in either green or yellow.
