

**FOX**

**2008**

**PREDATOR**

The original Micron P and PS are probably the most popular bite alarms specifically designed for predator fishing. It's the combination of functional drop back mechanics and state-of-the-art electronics that have made them favourites with predator anglers the world over.

The MkII versions feature completely new mechanical concepts as well as the latest digital electronics with a protective coating. Line release mechanisms are based on the MKII line-gate used on the Fox Swingers, which holds braid and mono securely in place but release freely on the strike. The PSR, a unit which resembles the PS, has an in-built FM radio transmitter which powers the RX3 Digital Receiver remote sounder unit (available separately).

All three models have weather-proof sealed cases complete with beta light slots and high output stainless steel speakers. They are perfect for leger and paternoster techniques and also as a back-up alarm when float fishing.

All P, PS and PSR Micron's are supplied with a hardcase

Micron PSR

#### Micron RX3 Digital Receiver

The Micron RX3 Digital Receiver will work at ranges of up to 200 metres from the PSR alarms, depending on atmospheric and bankside conditions. Digital technology allows far greater functionality than analogue systems.

CEI003	RX3 Digital Receiver	£139.99
CEI060	RX3 Pouch	£9.99
CEI079	RX3 Hardcase	£4.99

#### Micron P MkII Drop Off Alarm

A 'clip on' style bite alarm, with audible and visual indication, which fits to most banksticks. Fully adjustable to show runs and 'drop backs'. Perfect for leger and paternoster techniques and also as a back-up alarm when float fishing. Other features include:

- Tilt action sensing system
- High visibility red LED
- Illuminated red sight head lights up during a take
- 2 part locking bankstick clips in 4 diameters

PEI001	Micron P MkII Alarm	£29.99
--------	---------------------	--------

#### Micron PS MkII Drop Off Alarm

Rod rest mounted, fixed arm predator bite indicator which registers forward and 'drop back' runs. A pressure release switch disengages the alarm tone when the rod is lifted. Features include volume and tone control, an illuminated indicator head which lights up on a take or 'drop back', selectable colour LED, and three sizes of bankstick clips as well as:

- Tilt action sensing system
- High visibility LEDs
- Illuminating heads which light up during a take
- Low battery warning system

PEI002	Micron PS MkII Alarm	£44.99
--------	----------------------	--------

#### Micron PSR Drop Off Alarm

Identical functionality to the PS, but with an in-built digital transmitter compatible with the RX3 and I-Com Digital Receivers. Perfect when you are likely to have difficulty hearing your alarms, at night or in rough weather for example. Other features include:

- In-built FM radio transmitter, with 200 metre range\*
- Factory pre-set unique identifying code (no need to set code switches)
- Compatible with RX3 & I-COM digital receivers

PEI003	Micron PSR MkII Alarm	£79.99
PK9021	Extension Arms	£4.25

\* Subject to weather and bankside conditions.
