**2008**

**PREDATOR**

In a short space of time the Fox Stratos reels have become firm favourites with leading predator anglers. They help achieve superior casting distance, offer clinical line lay and have one of the most responsive clutches available on any reel on the market. They have been labelled by many leading angling journalists as 'the best reels on the market!'.

### Stratos FS Reels

Regarded by many independent testers as 'the best reels they have ever used', the Stratos FS range has quickly become firm favourites with predator anglers of all capabilities. Encompassing two reels (the FS10000 and FS7000), they offer superior casting thanks to the large aluminium spool and perfect line lay. The heart of the reels include 16 ball bearings to ensure it's incredibly smooth on the retrieve.

Other key features include:

- Twist free roller
- Spool reducer
- Supa-slow gear cycle
- Slipper Stealth clutch
- Spare spool
- Micro line-lay adjustment
- Free spool facility
- Multi disk front drag

CRL006	Stratos FS7000 (including spare spool)	£89.99
CRL007	Spare Spool	£14.99
CRL003	Stratos FS10000 (including spare spool)	£99.99
CRL004	Spare Spool	£14.99

Stratos FS7000

The highly polished machined spool reduces friction allowing the line to glide effortlessly off the spool when casting.

Stratos is supplied with a set of shims which can be used to customise the profile of the line lay on the spool to flat, front coned or back coned.

# STRATOS<sup>®</sup> FS and FSE REELS 10000 and 7000

### Stratos FSE Reels

When you consider that the FSE series are lighter than their namesakes (thanks to the graphite body and spools) and are still packed with top-end features, you'll be amazed to learn that prices start at under £50. There are two reels in the range – FS10000E and the smaller FS7000E.

Key features include:

- Nine ball bearings
- Spare spool
- Two line reducers
- Free spool facility
- Multi disk front drag
- Supplied with single and double handles

CRL010	Stratos FS7000E (including spare spool)	£49.99
CRL011	Spare Spool	£6.99
CRL008	Stratos FS10000E (including spare spool)	£54.99
CRL009	Spare Spool	£6.99

Stratos FS7000E

A single ball bearing is encapsulated within the line roller. This reduces slippage between the line and roller which, coupled with the slow oscillation, reduces line twist and wear on the monofilament.

Both E models feature slow oscillation for precise, even line lay resulting in smoother, longer casting.
