Predator tools

Fox Predator Tools are designed and manufactured to a very high standard. All feature our 'Sure Grip' anti-slip handles, ergonomically designed for extra comfort and maximum purchase. Most are made from stainless steel and coated for increased durability. The Crimping Pliers and Extra Long Side Cutters undergo a forging process that give them incredible strength. A must for the serious predator angler.

### Long Nose Pliers

These pliers feature a side cutter which will deal with wire traces and lightweight trebles and serrated jaws to provide a stronger grip when removing jaw hooked trebles. These pliers are small enough to be kept in your jacket pocket.

PTL003 7" - 178mm £8.99

### Predator Forceps

Featuring a short, extra strong stub nose, designed to provide max grip when removing trebles and large single hooks. They are available in two lengths - 6" and 9".

PTL006 6" - 165mm £6.99  
PTL007 9" - 245mm £7.99

### Split Ring Pliers

These Split Ring Pliers feature a special separator for opening up rings allowing treble hooks to be safely replaced, even on the largest of lures with the toughest of split rings. This tool is small and compact and will fit easily into your jacket pocket.

PTL008 5" - 127mm £6.99

### Extra Long Needle Nose Pliers

These Pliers have some of the toughest serrated jaws around. Ideally suited for removing large trebles that are often found on Jerk Baits, the extra length also means that you can keep your hands well clear of any flying or trailing trebles.

PTL004 11" - 280mm £9.99

### Trace Blades

Specially ground high quality Japanese Stainless Steel ensures that these cut cleanly through most modern stranded wires. Featuring soft touch handles for comfortable use even in the cold weather.

PK2405 Trace Blades £8.99

### Crimping Tool

Includes jaws with a five-impression 'footprint' to ensure the crimp grips the wire without damaging it. Supplied with two different size anvils to cover our range of crimps, these pliers have been developed to provide a professional crimp every time.

PTL002 6" - 150mm £7.99

### Extra Long Side Cutters

Designed to allow maximum cutting pressure to be applied whilst remaining slim enough to comfortably reach deeply seated hooks. Many top anglers now swear by this method, preferring to forfeit a treble rather than risk any damage to the fish.

PTL005 11" - 280mm £9.99
